Step Two

Introduce yourselves, and come up with your expectations for peer review. Write down these expectations.

Step Three

Peer review work on Chris' Piece: look at the first paragraph of Chris's piece and see if you can answer my question in the best and most specific way. My question: what, in your own words, is my thesis for my paper?

Step Four

Do peer review for 25-30 minutes—using the peer review sheet. Make sure that you swap papers, fill out the sheet, and then talk through your responses.

Step Five

At end, what are your next steps with this paper? What are the next three things that you need to do? Write them at the top of your electronic copy and save it
